

## Password manager user guide:

When starting up the application for the first time, choose create account to add an account.

In the new window enter the name and password for your new account.

Once a user account has been created you can log in using your name and password.

This will bring you to the password screen

Click Add Password to add a website, name, and password to your stored accounts.

Click view password on any of the stored accounts to see the stored password.

Click logout to switch to a different user.

Click Exit Application to exit the application.
